

SPECIAL EDITION ITEMS

UPDATED 02.04.08 – NOT FOR RE-PRINT WITHOUT PERMISSION

COCOON HAMMOCK

The Cocoon Hammock is designed to create a centerpiece effect in any outdoor lounge space. It is a special order item, and lead times may vary at different times of the year. The pieces are assembled in Belgium and require approximately 8 weeks lead time for production. The Cocoon is composed of several different parts:

HAMMOCK (SEATING AREA)

The actual hammock pad is made of double-stitched Batyline® with a 2" foam core. This foam is not water resistant and should be taken indoors during wet weather. The hammock area is a luxurious 113" square. Colors available: White or Cappuccino.

Batyline® is an extremely durable and high quality material consisting of a polyester fiber covered by a coating of PVC, making it nearly impossible to tear. It is 100% synthetic and resistant to rot and mildew. It is highly resistant to UV radiation and

fading. It can withstand temperature extremes, ranging from -30°C (-22°F) to 70°C (158°F.)

To clean any of the Batyline® components of the Cocoon, simply wash with a mild natural soap (such as a liquid dish detergent) and fresh water, using a soft bristle brush.

The foam core is removable (there is a zipper on the cover) and is secured to the cover by Velcro® strips, to prevent the core from slipping. The foam core should be removed prior to cleaning the cover.

FRAME & BASE

The frame is unfinished teak wood. The base is composed of two interlocking pieces and the support poles are screwed into the base. The exposed stainless steel components are made of 304L electropolished stainless steel.

The hammock is supported to the frame "arms" by metal hooks and ropes, which have been weight tested individually to support over 1,000 lbs individually. However, we only recommend a maximum of four adults on the Cocoon Hammock at one time, or 675lbs.

Simply wash the wood frame and stainless steel components with fresh water. Dry with a towel to remove water stains. Wood can also be re-treated at a later date with appropriate wood treatment products or can be given a new varnishing treatment. Please closely follow the instructions of any wood treatment/ varnishing product you select.

CEILING COVER

The "ceiling" cover is also made of removable Batyline®. Although not damaged by wet weather, we recommend the cover be taken indoors during heavy rain or storms, to prolong the cleanliness of

the cover and its long term use. Colors available: White or Cappuccino.

CURTAIN SET (OPTIONAL)

The curtain set, available separately, is made of a polyester and linen blend. The curtain set, as well as any optional throw pillows, should also be taken indoors when not in use, in case of rain. Colors: White.

The curtain set can be washed in the delicate cycle of a cold water washing machine, or hand-washed. The curtains should be line dried only.

WARRANTY

We warrant the Cocoon Hammock and its components (not including curtain set) against defects in construction and material for 3 years of normal residential use. This warranty does not apply to damage resulting from improper maintenance, misuse, negligence, or normal wear.

MONOLITH BENCH

Only twenty-five benches of the Limited Edition Monolith Bench are available. Each bench is fitted with a series number plaque underneath the seat and an additional plaque is provided for optional placement on the back of the bench

The bench is constructed using teak wood and is bonded by stainless steel bars embedded in the

wood slats, and finished by applying a top layer of adhesive SikaFlex® between the slats. SikaFlex® is a product specially developed for marine and outdoor use, and can be sanded, sealed, exposed to temperature extremes, and intense sunlight.

WARRANTY

Given the unknown weather conditions and general treatment each bench will be subject to, we limit the warranty of the construction and materials of the Monolith Bench for 5 years of normal residential use. This warranty does not apply to damage resulting from improper maintenance, misuse, negligence, or normal wear.

EDEN PLANTER

Made of weather-resistant bronze (steel with primer and oven-baked bronze powder coat). The color stability and durability for this finish are of the highest industry standard for exterior finishes, and should remain stable for a minimum of fifteen years. The planter has a total of 11 sides (panels) and one large drainage hole. Cleaning should be

limited to a soft cloth with water and mild soap. No abrasive or chlorinated products should be used. Be advised that the planter is very large and heavy, and should not be expected to be easily moved. It is hand-made in England.

WARRANTY

We warrant the planter, sold to the original owner to be free from defects in material and construction for 1 year of normal residential use. This warranty does not apply to damage resulting from improper maintenance, misuse, negligence, or normal wear.
