

SYNTHETIC RESIN

UPDATED 02.04.08 – NOT FOR RE-PRINT WITHOUT PERMISSION

Synthetic resin is used in our *Fusion Tribù* and *Vintage* collections.

The *Fusion Tribù* collection uses a unique polypropylene composite that was developed with a German manufacturer specifically for the outdoor market.

The *Vintage* seat shells are made of a high-grade injection-molded polypropylene with 15% glass fiber content for added stiffness.

The materials feature extreme density and resistance to UV ray damage, rot and mildew. They offer an elegant matte finish, unlike a typical "glossy plastic" finish.

Polypropylene allows for toxic-free recycling. Like other recycled polypropylene, materials are collected, sorted and sold to a re-manufacturer. The re-manufacturer then chips or shreds the plastic, washes it, melts it and re-moulds it into new items, such as traffic cones or compost bins. Please contact your local recycling program to find out where this material is accepted.

CLEANING & MAINTENANCE

The resin requires little maintenance, but should be washed regularly to avoid dirt or other particles from settling into the tiny pores of the matte finish.

To clean, simply use a damp sponge and fresh water, with a small amount of natural soap.

Do not clean using any type of abrasive agent or scouring pad, as scratches can remain on the surface.

For this reason, also avoid any scratches in general to the surface, including fingernail scratches. Over time, light scratch marks will fade, but it is best to avoid them in the first place.

Deep cleaning:

Ground-in dirt, or colored foreign substances can be difficult to completely remove from any white surface, so keep this in mind depending on your usage and the environment for your furniture.

Most food stains (olive oil, soy sauce, balsamic vinegar, etc.) should easily wipe off the surface. If you do encounter stubborn stains, clean with a store bought cleaner, such as "Formula 409® Deep Cleaning Kitchen Cleaner", or alternatively "Fantastik® All Purpose Heavy Duty Cleaner". Spray on resin surface and allow to sit one minute, then scrub with a soft pad, such as Scotch-Brite® Delicate Duty scrub sponge. Then wipe with a clean damp cloth. First test any product you purchase on a small, unseen area of the resin before tackling the whole job.

Similar to these cleaners, Henry Hall Designs does offer for purchase "Tribù Cleaner" from the resin manufacturer. Also available is "Tribù Protector", which adds some additional resistance qualities including slowing down long-term color fading in the Grey and Bronze colors. Our standard White color should not have any long-term color changes. These products are sold by the bottle – please contact Henry Hall Designs for more information.

WARRANTY

We warrant the resin used for *Fusion Tribù* sold to the original owner to be free from defects in material and construction for 2 years of normal residential use. This warranty does not apply to damage resulting from improper maintenance, misuse, negligence, or normal wear.
